

## **S-307L**

### **Long chain stabilized phosphate**

\* S-307L is a liquid blended phosphate formulation designed to provide 70% polyphosphate and 30% orthophosphate.

**DESCRIPTION:** It is specifically formulated to sequester and control minerals that cause scale buildup, deposits and staining while providing a corrosion control benefit over a wide range of water qualities. S-307L is a long chain linear phosphate complex formulated with only North American manufactured raw materials.

**SAFETY HANDLING AND STORAGE:** Avoid direct contact with skin and eyes. Personnel handling product should wear protective clothing and goggles. Spilled product should be contained and residues flushed with water. Major spills should be pumped into lined metal drums, fiberglass or plastic containers. As with all chemicals, Material Safety Data information should be consulted.

#### **TYPICAL PROPERTIES:**

Based on the available information, the product is not expected to produce adverse effects on health when used for the intended application and the recommendations provided in the MSDS are followed. If disposing of product, take care to protect the environment.

**PACKAGING:** S-307L is packaged 55 gallons drums, totes, and bulk.

#### **PHYSICAL CHARACTERISTICS:**

Phosphate Content	36% as PO <sub>4</sub>
Polyphosphate Content	70% of Phosphate Content
Orthophosphate Content	30% of Phosphate Content
Appearance	Liquid, Clear, Odorless
Specific Gravity	1.36
pH of Product	5.5
Shelf Life	More than two years
