

S4 Water Boiler Water Treatment Programs

S4 Water provides the water treatment market with a complete line of Boiler Water Treatment - Products & Services. As a leading supplier of water and wastewater treatment chemicals, S4 Water is devoted to Safety-First in the work place **and** to the environment. Our staff of qualified professionals is dedicated to provide you with the latest and surest technologies in serving your boiler and steam process system needs. S4 Water's product line is based on state of the art chemical technology and our service philosophy is "Whatever It Takes". We provide "real system" results and effectiveness!

S4 Water Boiler Water Treatments include:

- * The Latest Polymer Treatments.
- * Phosphate & Chelant Treatments.
- * Combined Technology Treatments.
- * Oxygen Scavenger Treatments.
- * Specialty Iron Dispersant Polymers.
- * Steam/Condensate Return Treatments.
- * Storage & Fuel Oil Treatments.

Technically Advanced Programs are available for all your steam boiler and closed-loop hot water boiler systems. They are field proven, results oriented, meet today's strict environmental laws -- and include the use of modern "fixed" Drumless Delivery systems.

Accessory & Monitoring Equipment is available and can be customized in S4 Water's broad line of boiler chemical feed pumps, feed systems, blowdown controllers and devices. We also offer a complete line of analytical testing equipment and reagents to monitor your boiler water treatment program and systems.

Consulting & Technical Services are an essential part of any successful boiler treatment program. Your S4 Water Technical Service Representative is experienced and qualified to provide you "First-Line" technical expertise. They (and you) are further supported by a team of Technical Specialists assigned responsibility to each account. You get a "Results-Oriented" Service!

Committed to Quality and Integrity in our products and services, we would welcome the opportunity to discuss the many programs we have to offer. We believe you will find our step-by-step diagnostic approach thoroughly evaluates your systems and will outline a complete treatment program of services & products at an economical cost.

To obtain further information or schedule an on-site evaluation, please call one of our **Customer Service Representatives** at (270) 781-0670 or visit us at www.s4water.net.
