

S4 Water Cooling Water Treatment Programs

S4 Water provides the water treatment market with a complete line of Cooling Water Treatment - Products & Services. As a leading supplier of water and wastewater treatment chemicals, S4 Water is devoted to Safety-First in the work place **and** to the environment. Our staff of qualified professionals is dedicated to provide you with the latest and surest technologies in serving your process and cooling water system needs. S4 Water's product line is based on state of the art chemical technology and our service philosophy is "Second to None". We provide "real system" results and effectiveness!

S4 Water Cooling Water Treatments include:

- * Modern Molybdenum Inhibitors.
- * Stabilized Phosphate Inhibitors.
- * All Organic Inhibitor Programs.
- * Scale/Silt/Deposit Control Products.
- * Biofilm Control & Dispersant Products.
- * Diverse Microbiological Treatments.
- * Specialty Polymers & Defoamers.
- * Sphagnum Moss - "All Green Treatment".

Technically Advanced Programs are available for closed-loop, once-through, and open-recirculating water systems - including chill water/air washer systems. They are field proven, meet today's strict environmental laws, and include the use of modern "fixed", Drumless Delivery systems.

Accessory & Monitoring Equipment is available and can be customized in S4 Water's broad line of chemical metering pumps, feed systems, and automated bleed/feed monitor/controller systems. We also offer a complete line of analytical equipment and reagents to monitor your programs.

Consulting & Technical Services are an essential part of any successful water treatment program. Your S4 Water Technical Service Representative is experienced and qualified to provide you "First-Line" technical expertise. They (and you) are further supported by a team of Technical Specialists assigned responsibility to each account. You get "Whatever It Takes" Service!

Committed to Quality and Integrity in our products and services, we would welcome the opportunity to discuss the many programs we have to offer. We believe you will find our step-by-step diagnostic approach thoroughly evaluates your systems and will outline a complete treatment program of services & products at an economical cost.

To obtain further information or schedule an on-site evaluation, please call one of our **Customer Service Representatives** at (270) 781-0670 or visit us at www.s4water.net.
